

CUT PRODUCTS

FESCOFIT

Description

Insulating boards consisting of expanded perlite, binders and fibres, and cut to special sizes in the factory.

Fescofit meets the requirements of EN 13169.

Production is covered by ISO 9001 and ISO 14001 certifications.

Uses

Fescofit is used for filling the troughs of raised seam metal roofs in refurbishment projects, for curved roofs, etc.

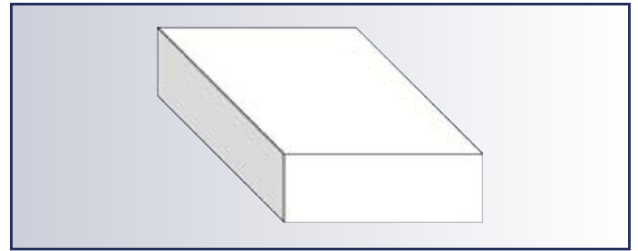

Characteristics

See Fesco product data sheet.

Dimensions: upon request

CE marking

Acermi Certificate n° 03/017/091

Advantages

- Ecological and recyclable
- Certified thermal properties
- Adapted to dimensional constraints
- Robustness

FESCO FILLET

Description

Trapezoidal piece cut in the factory from expanded perlite boards meeting EN 13169.

Production is covered by ISO 9001 and ISO 14001 certifications.

Uses

Fesco Fillet is used to fill angles at junction of horizontal and vertical roof areas.

Characteristics

See Fesco product data sheet.

Length: 1000mm

Sections: 50 x 50 mm

80 x 80 mm

100 x 100 mm

150 x 150 mm

Advantages

- Compression and indentation resistant
- Ecological and recyclable
- Reduces stress transmission at angles in the waterproofing layers
